

BONAR YARNS

Innovating performance for contact sports

MN ULTRA™

A yarn that delivers the impossible...

MN Ultra™ is Bonar's latest turf innovation and provides a unique combination of high performance features. This yarn increases the economic and performance benefits of synthetic turf even further and maximizes its comfort in play.

MN Ultra™ is the result of extensive research and testing in close collaboration with leading industry partners.

Innovative in-house manufacturing along with a new raw material mix exclusively available from Bonar Yarns form the foundation of MN Ultra™. The performance of MN Ultra™ has been validated by independent test institutes (test reports available upon request).

BONAR YARNS

What makes MN Ultra™ unique?

- MN Ultra™ outperforms other yarns in durability
- The yarn has excellent resilience
- and yet – MN Ultra™ is softer and more skin friendly than any other yarn.

Excellent durability for lasting playing characteristics

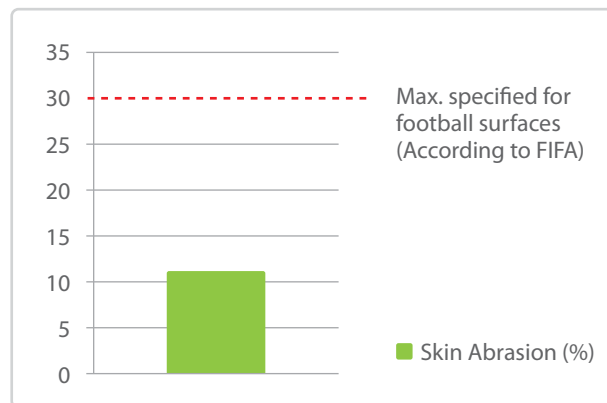

Lisport wear testing based on EN 15336 has proven that MN Ultra™ delivers great durability for contact sports fields.

Outstanding resilience for consistent ball roll

Independent ball roll testing according to a KNVB approved test method has shown that MN Ultra™ offers consistent and long lasting ball roll behaviour . Even after intense play, MN Ultra™ complies with FIFA ★★ ball roll standards. These results were further endorsed by in-house resilience testing showing categorically that MN Ultra™ outperforms alternative yarns.

Great softness for unrivalled skin friendliness

Despite its excellent durability, MN Ultra's™ softness significantly increases the playing comfort of turf and complies with FIFA norms for ★ and ★★ certified fields.*

MN ULTRA™

... a powerful mix of durability, resilience and softness

* MN Ultra™ was tested according to the FIFA Handbook of Test methods for Football Turf (2009 edition).
